Skills

C++ | C | Python | Machine Learning | PyTorch | OpenCV | JavaScript | React | Django | Pandas & NumPy | Ms. Excel | AI Tools | LLM | LangChain | MySQL | Git

Education

Delhi Technological University (formerly DCE), India

2023 - 2027

- Mathematics and Computing | CGPA: **7.35**

(expected)

Work Experience

Bluestock Fintech – SDE Intern

Jun 2025 – Jul 2025

Developed a production-ready IPO Web App from scratch with full frontend (React) and backend (Django REST API) integration.

Created a machine learning model for stock market fundamental analysis using Python and PyTorch.

Tech Stack: Python, Django, React, Django REST API, PyTorch, Machine Learning, Gen AI, Git

USIP DTU – Python & BCC Tutor

Sep 2024 – Nov 2024

Delivered hands-on training in Python, Basic Computer Concepts, MS Excel, and OpenAI tools to Class 12 students and college freshmen

Projects

SignLapse:- [\[GitHub Link\]](#)

Mar 2025 – Present

Machine Learning Lead | Python Developer

- Built Sign Language to Audio system using CNNs in PyTorch, integrated with OpenCV and MediaPipe for gesture detection. Trained on Kaggle dataset, utilized gTTS for speech generation, and employed OpenAI NLP API for forming meaningful sentence structures.
- Developed Audio to Sign Language pipeline for Classroom and YouTube environments, leveraging speech recognition and a 3D video dataset to dynamically stitch and display sign language videos in response to spoken input.

Tech Stack:- Python, PyTorch, OpenCV, Flask, Gemini API, Mediapipe, gTTS, Git

Virtual Paint:- [\[GitHub Link\]](#)

Nov 2024

Solo Developer | Computer Vision Engineer

- Developed an interactive virtual whiteboard application using Python, enabling users to draw with gestures using only their webcam and implemented real-time hand and finger tracking using OpenCV and MediaPipe, allowing gesture-controlled painting with features like multiple brushes, colours, and eraser.
- Designed a smooth and intuitive drawing experience by mapping finger movements to canvas coordinates, simulating full paint tool functionalities without any physical input device.

Tech Stack:- Python, Mediapipe, OpenCV, Matplotlib, Git

IPO Web App:- [\[GitHub Link\]](#)

Jun 2025

Full-Stack Developer (Internship Project)

- Built a full-stack web app to display real-time fundamentals and data of upcoming IPOs.
- Developed backend using Django REST API and frontend with React, styled to match production-level UI.
- Used PostgreSQL for data storage and synced backend APIs with frontend in real-time.

Tech Stack: Python, Django, React.js, PostgreSQL, Git

Achievements

- Won 1st place in two national-level hackathons **Brewing Codes 2.0 by UpGrad** and **SGU Hackathon** for the **SignLapse** project, a real-time sign language translator.
- Awarded **Best Innovation for Social Cause** at **Hackemon Hackathon** for building **SignLapse** using 3D sign language models in multiple formats including a YouTube Extension and a Classroom Web App.

Positions of Responsibility

Cultural Council, DTU – Logistics Head

Aug 2023 – Present

Responsible for planning and overseeing all logistical operations during college events. Handled coordination, resource allocation, vendor management, and smooth on-ground execution for large-scale cultural programs.

Literature and Film Council, DTU – Corporate Head

Aug 2023 – Present

Led sponsorship outreach by connecting with corporate partners to secure funding and brand collaborations. Successfully brought in sponsorships in exchange for PR visibility at multiple events and festivals.
